

# Community Enrichment Projects

## A Fresh Look on Raising a Village

**Purpose:** Mental Health America is embarking on a new venture focused on improving health access and education through Community-Directed Enrichment Projects. This unique program is invested in getting answers from the community and supporting the community in implementing these health projects. We are reaching out to you to assist us in this venture.

**Do you have a desire to ignite positive change and make a lasting impact on the world around you?**

- Do you have knowledge about community needs related to health and well-being that you want to share?
- Are you interested in connecting with community partners and recommending them for the change process?
- - Would you like to have a say in proposed community projects and bring ideas for necessary changes?
- Can you devote just 3 hours per month to in-person meetings?
- Do you feel comfortable presenting and discussing critical community issues with other members?

# Community Enrichment Projects

## Our Mission:

Join us in our goal to create positive change and build a better future for our community.

Mental Health America San Diego has decided to approach community development from a fresh perspective. We understand the importance of listening to the needs of the people we aim to serve. That's why we're calling on you to share your insights and help us prioritize the areas where our efforts can make the most impact.

Your contributions will enable us to direct funding and resources towards the areas that align with the needs and challenges faced by the individuals and families residing in San Diego County. By valuing community input and working together towards common goals, we can bring about meaningful improvements and build a brighter future for all.

Join us on this path and be part of a community that values your voice and empowers you to make a difference. Let's work towards our goal of creating positive change and building a better future for our community, together.
